Subject: August 29 and 30, 2019 Monitoring Station Data
Keegan Landfill
New Jersey Sports and Exposition Authority
Permit Activity Number: EIP190001
EA ID#: NEA 190001-13317

Dear Mr. Farrell and Mr. Meyer:

On August 29 and 30, 2019, NEXA, on behalf of the New Jersey Sports and Exposition Authority (NJSEA), notified the NJDEP hotline (1-877-WARNDEP) via phone that hydrogen sulfide (H₂S) gas measurements in excess of 30 ppb over a 30-minute period (rolling averages) were recorded at monitoring station MS-2 at the Keegan Landfill (see Attachment 1). NJSEA made this notification, as required under the NJDEP-approved Monitoring Action Plan and Reference #11 of the subject Permit, for raw data collected from MS-2 on August 29 and 30, 2019 (see Attachment 2). We provide discussion and analysis of the data recorded at MS-2 below.

MONITORING STATION MS-2

The 30-minute rolling average H₂S concentration was in excess of 30 ppb between 10:36 pm and 11:33 pm on August 29; and, between 12:03 am and 12:15 am and between 12:54 am and 3:42 a.m. on August 30 at Monitoring Station MS-2 (see raw data in Attachment 2). The hydrogen sulfide concentration, average wind speed and wind direction measured during the period of the exceedance are provided in Attachment 3. The average wind speed was between 0.8 and 0.9 mph and the average wind direction was between 198 and 254 degrees, respectively (i.e., from the southwest). The wind direction and MS-2 are shown on a map of the site. The nearest potential receptor is approximately 3,000 feet from the monitoring station (see Attachment 4).

The cause of the emissions from Monitoring Station MS-2 appears to be uncontrolled emissions from the Landfill. There was no corrective action implemented in accordance with the Odor Control Plan as the exceedances occurred overnight and returned to less than 30 ppb within approximately three hours (maximum). Construction of a landfill gas collection and control system (GCCS) has

August 31, 2019

Page 2

commenced. The GCCS is expected to be operational by September 17, 2019 to control emissions from the Landfill.

Please call either of the undersigned with any questions or comments.

Sincerely,

Christine H. Stokes
